**Bengaluru**

**ಬೆಂಗಳೂರು**

**ಬೆಂಗಳೂರು**

Bengaluru, a megacity where ASIA's first street light was lit up in 1905. With over 861 streetlights and 1639 domestic . . . . . connections.

Bangalore became one of the first cities in India to have electricity from Hydro Power, powered by the hydroelectric plant situated in **Shivanasamudra**.

It is also known as the 'SILICON VALLEY of INDIA' because large number of Information Technology companies are located in the city which contribute higher rate of IT exports from India.

India's third largest software companies Infosys and Wipro are headquartered in Bangalore, along with other major companies like HAL and ISRO.

Bengaluru is home to many educational and research institutions as well.

A rapid transit system called the Namma Metro is being built in stages.

Bengaluru is known as the 'Garden City of India' because of its greenery and presence of many public parks, amongst which Lal Bagh and Cubbon Park are well known.

# Decade Journey of Vtech Biotron – LunnArk

- 2006** Vtech Biotron Private Limited was registered.
- 2010** Initiated LED business vertical with design and development team and prototype product development.
- 2011** Indigenously designed Backlit downlight plastic injection moulds for 10W and 20W LED luminaires using 0.5W refund Low Power LED with injection moulded opac diffuser. Designed and developed in-house constant-current LED drivers.
- 2012** Design and production of backlit 2x2 grid / lay-in ceiling / POP luminaries with PMMA diffuser was initiated. 30W/40W/50W range of power was introduced first in the market with aluminium reflectors and LEF film for higher efficacy. Developed Illusive Sky ceiling lights for Hospital, Patient care and Lobbies. Retrofit for CFL kit was developed and helped many facilities with their initial ROI and CAPEX concerns.
- 2013** Launched second generation slim backlit luminaries of various sizes ranging from 1x2, 2x2, 2x4 for grid / lay-in POP.
- 2014** Design, development and production of clean room luminaires, clip-in ceiling fixtures. Also initiated industrial low-bay lights. Completed first export to Lagos - Nigeria, executing 100,000 sq ft. lighting for Hospital with grid & clean room lights.
- 2015** First in India to launch in-house developed replacement for 4 x 54W Badminton (Shuttle) court diffused light fitting with lowest NRC prismatic diffuser options including 150W and 200W with a size of 490mm x 1200mm light fixtures. More than 100 Badminton courts were installed with LunnArk luminaires in a span of 4 years.
- 2016** Span of 5 years, completed 20 hospitals, major technology and Pharmaceutical companies, Malls across 5 states in Southern India – completed lighting up 2 million square feet artificial lighting area.
- 2017** Ventured into Linear profile, commercial decorative luminaires and stretch fabric ceiling to match the changing trend of true-ceiling interior designs.
- 2018** Range of technical decorative lights were introduced by LunnArk, incorporating True ceiling design element. The luminaire size designed to the tune of 1200mm to 3000mm diameter with single diffuser. Introduced color tuning (Tunable White) with Dali and Bluetooth connectivity.
- 2019** “Elemental lighting luminaire designs were introduced; Concrete, Clay, Wood, Jute, Wicker, Borosilicate Glass, Cork, Acrylic, Thread and FRP.
- 2020** From 2018 to 2020, major projects were completed with Lunnark technical decorative luminaires, lighting up project space totaling 5 million square feet. Initiated the development of Circadian lighting technologies integrated with LunnArk technical decorative luminaries.

---

## ABOUT US

Brand LunnArk® by Vtech Biotron Private Limited provides Innovative & Integrated LED lighting solutions that are characterized by exceptional design, while enhancing the integrity of Architect's and Lighting Designer's vision, incorporating benchmarked luminaire standards.

Founded by Mr. Srinivas Arkasalli, Electronics Engineer with more than 30 years of experience in the field of Electrical, Biomedical Management and Healthcare services. Managing teams and heading operations across the globe in various facility & Healthcare Management Organizations to deliver Quality products and Customer service solutions.

Vtech Biotron, a Brainchild was initiated by Mr. Srinivas, when LED lighting was in its nascent developmental stage. He foresaw sustainable value in technology that could provide efficiency and cost effectiveness, which can help in achieving sustainability in lighting industry fostering Make in India initiatives. With a big vision, a few hundred square-feet sized manufacturing unit in Rajajinagar Industrial town - Bangalore and with a passionate team is how Vtech Biotron Private Limited began its journey in providing LED lighting solutions.

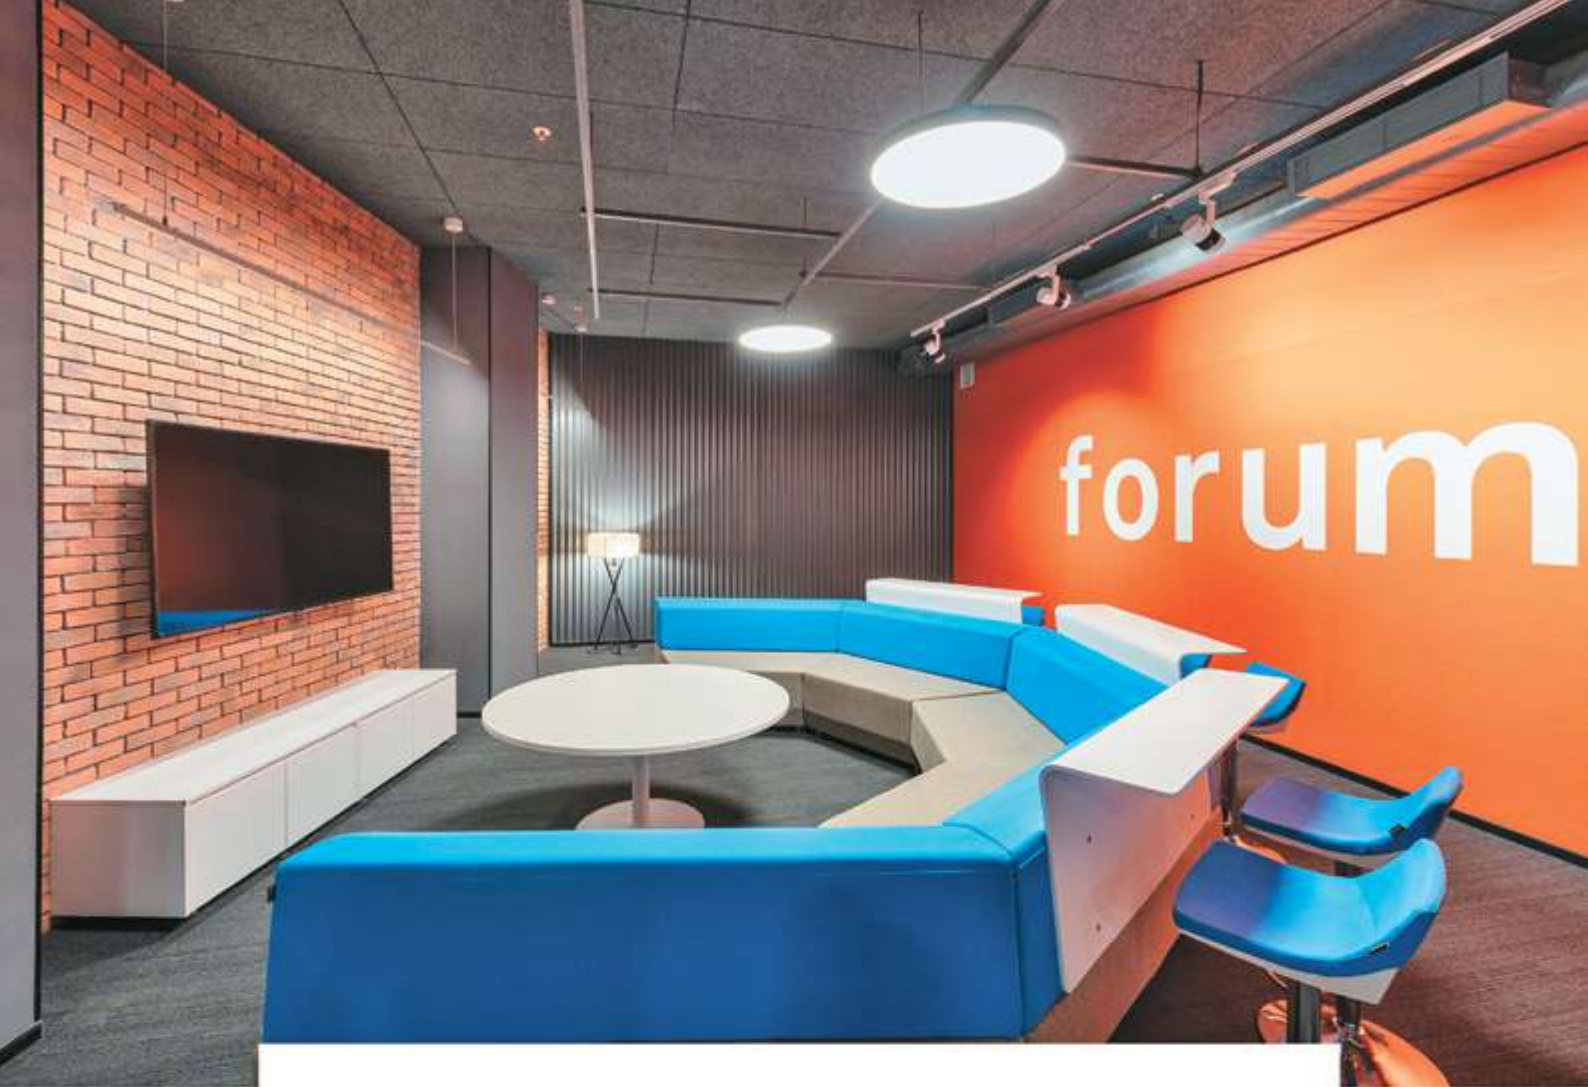

*“ Luminaire manufacturing is not about merely making fixtures with LEDs, it's a science in itself and needs detailed attention to factors that contribute to elevate human moods and create an environment that foster positive well-being ”*

*-Srinivas Arkasalli, CMD, LunnArk-Vtech Biotron*

Having established our Design, Sales and Support reach in India, Africa and Middle East, we are committed to manufacture Internationally benchmarked luminaires and provide end-to-end lighting solutions for industrial, commercial, healthcare, sports, clean-room, educational institutions and also undertake key CUSTOMIZATION projects. Our strengths include an excellent team of Engineers and Technicians who are dedicated and driven by passion pushing the technical paradigm with ground breaking light fixtures. We offer products with LM 79, ERDA, BIS certifications. We at Vtech Biotron are fully capable of executing a project right from its Design Inception stage, Manufacturing, Supply, Installation and Handover.

Let the FASCINATING light fittings cast a spell

**LIGHT INNOVATIONS AT ITS BEST**

# GEOMETRICAL

# SHAPES

- CONVEYS IDEAS OR CONCEPTS
- SETS A MOOD OR EMOTION
- CREATES DEPTH
- CONNECTS CONTENT AND IMAGERY IN SPACE

GEOMETRIC PATTERNS ARE COLLECTION OF SHAPES, REPEATING OR ALTERED TO CREATE A COHESIVE DESIGN. GEOMETRIC DESIGNS IN LUMINAIRES GO BEYOND BASIC SHAPES TO TELL MORE STORIES AS DIFFERENT SHAPES CAN EVOKE DIFFERENT MEANINGS. THEY PROVIDE DEFINITION AND MEANING TO OUR ENVIRONMENT.

COMBINING THESE SHAPES IN DIFFERENT WAYS CAN ENTIRELY CREATE NEW MEANINGS. FOR EXAMPLE, CREATING SOMETHING OUT OF RECTANGLES AND TRIANGLES COULD EMPHASIZE A CALL TO RETURN TO TRADITION.

GEOMETRIC PATTERNS DONT HAVE TO BE SYMMETRICAL, SOMETIMES CREATING SOMETHING WHERE SHAPES AND LINES DIFFER ACROSS THE BOARD CAN CREATE A STRIKING EFFECT.

By use of MATHEMATICAL PRINCIPLES, ANCIENT DESIGNERS USED GEOMETRIC SHAPES TO COMMUNICATE IDEAS AND PROVIDE KNOWLEDGE ABOUT SCIENCE, RELIGION AND HUMANITY. HENCE GEOMETRIC SHAPES HAVE BEEN PRESENT IN ART FOR CENTURIES.

# THE HEXAGON ON SATURN?

**YOU MAY HAVE HEARD OF THE RED SPOT ON JUPITER, A MASSIVE STORM. IT'S ROUGHLY OVAL-SHAPED, WHICH WOULD MAKE SENSE FOR A STORM OR WEATHER PATTERN. YOU MAY NOT HAVE HEARD, HOWEVER, THAT ON THE NORTH POLE OF SATURN, IS A MASSIVE HEXAGONAL STORM, LARGE ENOUGH TO FIT THE PLANET EARTH.**

**THE ASSOCIATIONS ARE POWERFUL.**

# MINO

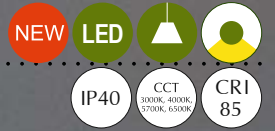

---

A Ceiling lamp of 20-30W range. The fixture body is Spun Aluminium metal. Discrete LED with each LED of 0.5W is used, which is 30-40mm inner to the fixture's edge. The Diffuser is of Regressed type.

Suspension can be either single suspension or 3 way suspension. Single suspension would be of standard 1 meter length.
